Response to Amendment

- 1. Applicant's amendment and remarks of Septemi: er 11, 2006 are acknowledged and entered and have been fully considered.
- 2. Applicant's arguments have been considered by are moot in view of the new ground(s) of rejection.
- 3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

4. Claims 16, 19, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buchholz et al. in view of Pontoppidan.

Buchholz et al. discloses a fuel injector comprising a fur I inlet, a movable valve closure member 9, a fixed valve seat element 13 to cooperate with the valve-closure member as recited, and a downstream valve end including an outlet component 23 and a fuel outlet 41, wherein the fuel outlet includes at least one discharge of the outlet component, the outlet component including the at least one discharge orifice is arranged directly downstream of the fixed valve seat element and permanently joined to the fixed valve seat element. Buchholz et al., however, does not disclose the coating as recited. Pontoppidan teaches a fuel injector comprising a movable valve-closure member 9 and a fixed valve seat element to cooperate with the valve-closure member to open and close a valve in which the seat has an outlet that includes a coating around the discharge orifice including in an immediate exterior of an outlet area of the discharge orifice to protect against scaling. It would have been obvious to one having

Application/Control Number: 10/030,586

Art Unit: 3752

ordinary skill in the art at the time the invention was made to have modified the device of Buchholz et al. by providing a coating at least one discharge orifice as taught by Pontoppidan in order to protect against scaling.

5. Claims 21-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buchholz et al. in view of Pontoppidan as applied to claim 16 above, and further in view of Fedorovich et al.

Fedorovich et al. teaches coating internal combustion engines with fluorosilicate to improve heat resistance of the various surfaces of the engines. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Buchholz et al. and Pontoppidan by providing a coating comprising fluorosilicate as taught by Fedorovich et al. in order to provide heat resistance also. The actual coating area would have been a matter of design choice depending on the required coverage area and the method of spraying or dipping as recited in claim 24 would have been a matter of production preference since both methods are known in the art.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 10/030,586 Page 4

Art Unit: 3752

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-27?-4904. The examiner can normally be reached on 8:00-4:30. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Schert el can be reached on 571-272-4919. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov.
